The Smart Solution

Decorating Appeal *That Individual Touch!*

Today's awnings combine functional excellence with decorative appeal to create an almost unlimited pallet of individualized design possibilities. Awnings can complement or dramatize the architecture of most any home. Highly engineered yet flexible awnings can be designed to blend with or accentuate the special features of your special castle, while providing protection from sun and rain.

Today's awnings reflect advanced technology in fabric, hardware and framework systems and the very best in craftsmanship from local awning manufacturers. They can be stationary or retractable, graphically embellished or distinctively unadorned. Awnings - a crafted product that offers unlimited design possibilities.

Sun And Rain Protection

A place in the shade is even better than a place in the sun. And it's doubly nice when it's created out of canvas and other industrial fabrics.

Industrial fabrics are strong enough to withstand wind, rain and sun – yet light enough to give you that “outdoor” feeling. Shape it in any of a hundred designs – to cover a patio, protect an entrance, decorate a poolside area – and it seems to float gently overhead. A variety of fabrics are available, from vinyl coated cotton to woven acrylic materials, that can provide you with durability, ease of maintenance and a huge selection of vivid colors.

Pretty And Practical, Too

Awnings conserve energy by shading windows and reducing interior temperatures. According to a study by the American Society of Heating, Refrigeration and Air Conditioning Engineers (ASHRAE), awnings on windows and patio doors can reduce interior temperatures between 8° - 15°. The exact amount of heat reduction depends upon several factors: the exposure of the window, the color of the fabric and the style and method of attaching the awning. As an example, awnings can reduce solar heat gain by up to 65 percent on south-facing windows and 77 percent on west-facing windows.

AWNINGS

The Smart Solution

This summer, find your place in the shade. Make it pretty. Make it practical. Make it out of canvas and industrial fabric. It'll have more style for less cost than any other outdoor material you could choose. Call your local awning and custom canvas firm to come out soon and talk it over!
